

# Sixth National Food Show and Industrial Exposition

Convention Hall

November 1st. to 13th, 1915

When you attend the  
Food Show  
at Convention Hall  
This Week

VISIT THE ELECTRIC  
SERVICE EXHIBIT

POTOMAC ELECTRIC  
POWER COMPANY

Be Sure to See the  
SPLENDID EXHIBIT  
of  
Gas-Cooking and  
Gas-Lighting Appliances

at the

Food Show  
CONVENTION HALL

November 1st to 13th

One of the features of the exhibit will be a modernly equipped five-room apartment—lighted by Gas—with fixtures of newest design and supplied with gas appliances of every sort, demonstrating the ease and economy of gas for heating, cooking and lighting.

Every afternoon from 1:30 to 2:30 Mrs. Mary Harris Hoar will deliver interesting lectures on the art of cookery.

We Belong in This Exhibit

Where anything of interest to housekeepers is concerned the TOLMAN LAUNDRY has a place—for its service is one of the most important factors in modern day affairs—serving the family individually and collectively.

We must put emphasis on our specializing service—for it is that which makes this the "different" Laundry. The Laundry with a standard that it maintains—so that week after week your work is uniformly satisfactory—and what was an endless cause of worry becomes a matter of no concern. You know the Tolman Laundry will look after every piece of work as it should be looked after.

You'll find attendants in the Booth glad to go into details with you.

New Method  
New Type GAS RANGES

See Our Exhibition at the Pure Food Show

From the New Method line of Gas Ranges you can obtain any style or priced range that you desire, all of which have NEW METHOD patented improvements that cannot be obtained with any other gas range. They are in Porcelain, Nickel or Plain finish.

See Our Big Line of  
WHITE ENAMEL NEW METHOD RANGES.

The first cost of a gas range is a small matter comparatively; it is the cost of operation the year around that is the most vital point for you to consider.

It Costs Less to Operate a New Method  
Than Any Other Gas Range.

These figures were secured as the result of a most thorough competitive test.

NEW METHOD PATENTED HEAT AND AIR CIRCULATOR

Is the result of long experimenting on scientific lines to produce absolutely perfect combustion.

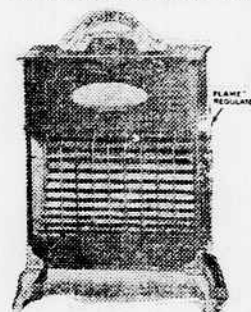

The only way to eliminate odor from the flame is to feed it with oxygen from the air that every portion of the carbon gas will be consumed. It has been the object of scientific research for centuries.

We have reached this goal in our new circulator. We draw cold air from the farthest corner of a room, heat it and return it to its most remote starting point.

As long as the flame is burning this current of air is revolving throughout every portion of the room.

Your inspection is invited.
